

Intelligent Tunable White LED Driver (Constant Current)

- Housing made from SAMSUNG/COVESTRO's V0 flame retardant PC materials
- Ultra small, thin and lightweight, screwless end cap.
- Change the output current, dimming mode and other parameters via the APP.
- Adjustable output current with 1mA step.
- $\bullet\,$ Automatically recognize 0-10V and 1-10V input signal.
- Ultra-low consumption of 0-10V ports < 0.05mA.
- $\bullet\,$ Soft-on and fade-in dimming function enhances your visual comfort.
- T-PWMTM super deep dimming technology, 0.01% dimming depth.
- The whole dimming process is flicker-free with high frequency exemption level.
- Comply with the EU's ErP Directive, networked standby<0.5W.
- When there is no load, the output will be 0V to prevent damage to LEDs due to poor contact.
- Overheat, over voltage, overload, short circuit protection and automatic recovery.
- Normal service life can reach 100,000 hours.
- 5-year warranty (Rubycon capacitor).

4 in 1 dimming 0-10V 1-10V 10V PWM RX

Technical Specs

Model		SE-40-1	300-1050-W2A	SF-30-	-200-800-W2A				
	Output Type	Constant current SE-30-200-800-WZA							
	Dimming Interface	0-10V [1-10V, 10V PWM, RX]							
Features	Output Feature								
	Protection Grade	Isolation IP20							
	Insulation Grade	Class II (Suitable for class I/ II /III light fixtures)							
	Output Voltage	9-42Vdc							
	Maximum output voltage								
OUTPUT		<55Vdc							
	Output Current Range	300-1050mA 200-800mA 2.7W-40W 1.8W-30W							
	Output Power Range	2.7W-40W 1.8W-30W 0~100%, down to 0.01%							
	Dimming Range LF Current Ripple	<3%(Maximum current for non dimming state)							
	Current Accuracy	<3%[Maximum current for non dimming state] ±5%							
	PWM Frequency	±5% ≤3600Hz							
	. ,								
	DC Voltage Range	120-250							
	AC Voltage Range	100-240Vac							
	EoFi	100%	0001/						
	Input Voltage	115Vac/230Vac							
	Frequency	50/60Hz							
	Input Current								
	Power Factor	PF>0.95/115Vac (at full load), PF>0.9C/230Vac (at full load)							
INPUT	THD	THD≤10%/230Vac, at full load							
	Efficiency (Typ.)	88% 87%							
	Inrush Current			s tested under 50% Ipeak)/230Vac					
	Anti Surge	L-N: 2KV							
	Leakage Current	Max. 0.5mA							
	Working Temperature	ta: -20 ~ 45°C tc: 90°C							
	Working Humidity	20 ~ 95%RH, non-condensing							
ENVIRONMENT	Storage Temperature/Humidity	-40 ~ 80°C/10~95%RH							
	Temperature Coefficient	±0.03%/°C[0-50°C]							
	Vibration	10~500H	10~500Hz, 2G 12min/1cycle, 72 min for X, Y and Z axes respectively						
	Overload Protection	Automatically protect the device when the load exceeds 102% of the rated power. Automatically recover once load is reduced

Unit: mm

Wiring Diagram

3. Brightness and color temperature adjustment respective

4. Brightness and color temperature adjustment simultaneous $% \left(1\right) =\left(1\right) \left(1\right)$

Four-wire LED connection

* Adopting constant power program design, it keeps the same brightness in color temperature dimming, twice the rated power load can be connected.

40 W driver, 40 W X 2CH load can be connected, the total power of the 2 channels will be kept in 40 W.

Table of Typical Corresponding Parameters for Current

The typical 16 current data sets below are for reference when selecting LED fixture models. More current levels can be set by NFC using mobile APP with 300-1050mA adjustable in 1mA step									
	Output Current	300mA	350mA	400mA	450mA	500mA	550mA	600mA	650mA
	Output Voltage	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc

Application Diagram of Protective Cover

1. Put the head of a screwdriver on the side of the housing to pry up both the protective cover and wire fixing board. Then remove the wire fixing board and connect to the wires as wiring diagram shows.

2. Install the wire fixing board and press it down. Then snap on the protective cover while pressing the wire fixing board with a small flat-head screwdriver

Installation Precautions

Please do not stack the products. The distance between two products should be \geqslant 15cm so as not to affect heat dissipation or the lifetime of the products.

Please not place the products on power supplies. The distance between the product and the power supplies should be $\geqslant 15$ cm so as not to affect heat dissipation or shorten the lifetime of the products.

Note: The temperature within the installation area should be within the working temperature range of the products. Please do not install products inside LED fixtures to avoid temperature exceeding the working temperature that may affect the product lifetime.

Use the NFC Lighting APP

Scan the QR code below with your mobile phone and follow the prompts to complete the APP installation (According to performance requirements, you need to use a NFC-capable Android phone, or an iphone 8 and later that are compatible with iOS 13 or higher).

* Before you begin setting the parameters of the driver, please make sure the driver is powered off.

Read/Write the LED driver

Use your NFC-capable phone to read LED driver data, then edit the parameters and they can be directly written to the driver.

1. Read the LED driver

On the APP home page, click [Read/Write LED driver], then keep the programmer's sensing area close to the NFC logo of the driver to read the driver parameters.

2. Edit the parameters

 $\textbf{Click [Parameter settings]} \ \ to \ edit \ the \ advanced \ parameters, \ like \ output \ current, \ dimming \ mode, \ low \ power \ mode, \ etc.$

3. Write to the driver

After completing the parameter settings, click [Write] in the upper right corner, and keep the programmer's sensing area close to the NFC logo of the driver, so the parameters can be written to the driver.

Relationship Diagrams

Transportation and Storage

1. Transportation

Products can be shipped via vehicles, boats and planes.

During transportation, products should be protected from rain and sun. Please avoid severe shock and vibration during the loading and unloading process.

2. Storage

The storage conditions should comply with the Class I Environmental Standards. The products that have been stored for more than six months are recommended to be re-inspected and can be used only after they have been qualified.

Attentions

- Products shall be installed by qualified professionals.
- LTECH products are and not lightning proof non-waterproof (special models excepted). Please avoid the sun and rain. When installed outdoors, please ensure they are mounted in a water proof enclosure or in an area equipped with lightning protection devices.
- Good heat dissipation will prolong the working life of products. Please ensure good ventilation.
- Please check if the working voltage used complies with the parameter requirements of products
- $\bullet \quad \text{The diameter of wire used must be able to load the light fixtures you connect and ensure the firm wiring.}\\$
- Before you power on products, please make sure all the wiring is correct in case of incorrect connection that causes damage to light fixtures.
- If a fault occurs, please do not attempt to fix products by yourself. If you have any question, please contact your suppliers.
- * This manual is subject to changes without further notice. Product functions depend on the goods. Please feel free to contact our official distributors if you have any question.

Warranty Agreement

- Warranty periods from the date of delivery: 5 years.
- $\bullet \quad \text{Free repair or replacement services for quality problems are provided within warranty periods}.$

Warranty exclusions below:

- Beyond warranty periods.
- Any artificial damage caused by high voltage, overload, or improper operations.
- Products with severe physical damage.
- Damage caused by natural disasters and force majeure.
- Warranty labels and barcodes have been damaged.
- No any contract signed by LTECH.
- 1. Repair or replacement provided is the only remedy for customers. LTECH is not liable for any incidental or consequential damage unless it is within the law.
- 2. LTECH has the right to amend or adjust the terms of this warranty, and release in written form shall prevail.
