LTECH

LED Driver (Constant Current)

- The housing is made from V0 flame retardant PC materials.
- Ultra-small, thin and light screwless end cap.
- Change the output current, Max Level and other parameters via the APP.
- Adjustable output current with 1mA step.
- Soft-on and fade-in dimming function enhances your visual comfort.
- High performance, high efficiency, low THD.
- Innovative thermal management technology intelligently protects the life of the LED driver.
- Overheat, overvoltage, overload, short circuit protection and automatic recovery.
- Suitable for Class I / II / III indoor light fixtures.
- Indoor office lighting, decorative lighting and commercial lighting.
- 5-year warranty.

Technical Specs

Model			SN-15-100-450-G1NF		
Features	Output Type		Constant Current		
	Output Feature		Isolation		
	Protection Grade		IP20		
	Insulation Grade		Class II (Suitable for class I/ II /III light fixtures)		
OUTPUT	Output Voltage		9-42Vdc		
	Maximum output voltage		≤52Vdc		
	Output Current Range		100-450mA		
	Output Power Range		0.9W-15W		
	Current Accuracy		±5%		
	Current Ripple		<5% (When outputting maximum current)		
INPUT	DC Voltage Range		220-240Vdc		
	Input Voltage		220-240Vac		
	Frequency		50/60Hz		
	Input Current		≤0.09A		
	Power Factor		PF>0.9 (at full load)		
	THD		THD<10% (at full load)		
	Efficiency (Typ.)		≥84% (at full load)		
	Inrush Current		Cold start 15A(Test twidth=112us tested under 50% Ipeak)/230Vac		
	Anti Surge		L-N: 2KV		
	Leakage Current		Max. 0.5mA		
ENVIRONMENT	Working Temperature		ta: -20 ~ 50°C tc: 85°C		
	Working Humidity		20 ~ 95%RH, non-condensing		
	Storage Temperature/Humidity		-40 ~ 80°C/10~95%RH		
	Temperature Coefficient		±0.03%/°C(0-50°C)		
	Vibration		10~500Hz, 2G 12min/1cycle, 72 min for X, Y and Z axes respectively		
PROTECTION	Overload Protection		Automatically protect the device when the load exceeds 102% of the rated power. Automatically recover once load is reduced		
	Overheat Protection		Intelligently adjust or turn off the current output if the PCB temperature ≥110°C. automatically recover normal output		
	Overvoltage Protection		Automatically protect the device when voltage exceeds the no-load voltage. It can be recovered automatically		
	Short Circuit Protection		Enter hiccup mode if short circuit occurs, and recover automatically		
SAFETY & EMC	Withstand Voltage		I/P-O/P: 3750Vac		
	Insulation Resistance		I/P-O/P: 1 Insulation Resistance 00MΩ/500VDC/25°C/70%RH		
	Safety Standards	CCC	China	GB19510.1, GB19510.14

Table of Typical Corresponding Parameters for Current

The typical 16 current data sets below are for reference when selecting LED fixture models. More current levels can be set by NFC using mobile APP with 300-1050mA adjustable in 1mA step								
Output Current	100mA	150mA	200mA	250mA	300mA	350mA	400mA	450mA
Output Voltage	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc	9-37Vdc	9-33Vdc
Output Power	0.9-4.2W	1.35-6.3W	1.8-8.4W	2.25-10.5W	2.7-12.6W	3.15-14.7W	3.6-15W	4.05-15W

Protective Housing Application Diagram

Crimping cover buckle
Use a screwdriver to wire according to the wiring diagram.

Snap together the terminals on both sides with protective covers, nd press down until it is flat with the housing.
Removal of crimping cover
Pry the protective cover at the bottom of the housing left/right with a screwdriver to remove it.

Installation Precautions
Please do not stack the products. The distance between two products should be ≥15cm so as not to affect heat dissipation and the lifespan of the products.
Please not place the products on LED drivers. The distance between the product and the driver should be ≥15cm so as not to affect heat dissipation and shorten the lifespan of the products.
Note: The temperature within the installation area should be within the working temperature range of the products. Please do not install products inside LED fixtures to avoid temperature exceeding the working temperature that may affect the product lifetime.

LTECH

Use the NFC Lighting APP

Scan the QR code below with your mobile phone and follow the prompts to complete the APP installation (According to performance requirements, you need to use a NFC-capable Android phone, or an iphone 8 and later that are compatible with iOS 13 or higher).

✱ **Before you begin setting the parameters of the driver, please make sure the driver is powered off.**

Read/Write the LED driver

Use your NFC-capable phone to read LED driver data, then edit the parameters and they can be directly written to the driver.

1. Read the LED driver

On the APP home page, click【Read/Write LED driver】, then keep the programmer's sensing area close to the NFC logo of the driver to read the driver parameters.
NFC logo of the driver
2. Edit the parameters

Click 【Parameter settings】to edit the advanced parameters, like output current, Max Level, power-on fading time, etc.

3. Write to the driver

After completing the parameter settings, click 【Write】 in the upper right corner, and keep the programmer's sensing area close to the NFC logo of the driver, so the parameters can be written to the driver.

Modulation Area Diagram

High Frequency Exemption Area Diagram

IEEE 1789

Limit of modulation in low risk area	
Waveform frequency of optical output	limit [%]
f ≤ 8Hz	0.2
8Hz < f ≤ 90Hz	0.025 × f
90Hz < f ≤ 1250Hz	0.08 × f
f > 1250Hz	Exemption assessment
Limit of modulation in no effect area	
Waveform frequency of optical output	limit [%]
f ≤ 10Hz	0.1
10Hz < f ≤ 90Hz	0.01 × f
90Hz < f ≤ 3125Hz	(0.08/2.5) × f
f > 3125Hz	Exemption assessment (High frequency exemption)

Transportation and Storage

1. Transportation

Products can be shipped via vehicles, boats and planes.

During transportation, products should be protected from rain and sun. Please avoid severe shock and vibration during the loading and unloading process.

2. Storage

The storage conditions should comply with the Class I Environmental Standards. The products that have been stored for more than six months are recommended to be re-inspected and can be used only after they have been qualified.

LTECH

Attentions

- This product must be installed and adjusted by a qualified professional.
- This product is non-waterproof (special models excepted). Please avoid the sun and rain. When installed outdoors, please ensure it is mounted in a water proof enclosure.
- Good heat dissipation will extend the life the product. Please install the product in a environment with good ventilation.
- When you install this product, please avoid being near a large area of metal objects or stacking them to prevent signal interference.
- Please keep the product away from a intense magnetic field, a high pressure area or a place where lightning is easy to occur.
- Please check whether the working voltage used complies with the parameter requirements of the product.
- Before you power on the product, please make sure all the wiring is correct in case of incorrect connection that may cause a short circuit and damage the components, or trigger a accident.
- If a fault occurs, please do not attempt to fix the product by yourself. If you have any question, please contact the supplier.

＊ This manual is subject to changes without further notice. Product functions depend on the goods. Please feel free to contact our official distributors if you have any question.

Warranty Agreement

- Warranty periods from the date of delivery: 5 years.
- Free repair or replacement services for quality problems are provided within warranty periods.

Warranty exclusions below:
- Beyond warranty periods.
- Any artificial damage caused by high voltage, overload, or improper operations.
- Products with severe physical damage.
- Damage caused by natural disasters and force majeure.
- Warranty labels and barcodes have been damaged.
- No any contract signed by LTECH.

1. Repair or replacement provided is the only remedy for customers. LTECH is not liable for any incidental or consequential damage unless it is within the law.
2. LTECH has the right to amend or adjust the terms of this warranty, and release in written form shall prevail.
