

LED Driver (constant Voltage)

- Ultra-thin, ultra-small. Housing is made from V0 flame retardant PC materials.
- Clamshell style case and wire clamping structure for convenient wire connection.
- Innovative thermal management technology intelligently protects the life of the LED driver.
- Overheat, overload, short circuit protection and automatic recovery.
- . Suitable for Class I / II / III indoor light fixtures.
- Indoor office lighting, decorative lighting and commercial lighting. 5-year warranty (Rubycon capacitor).

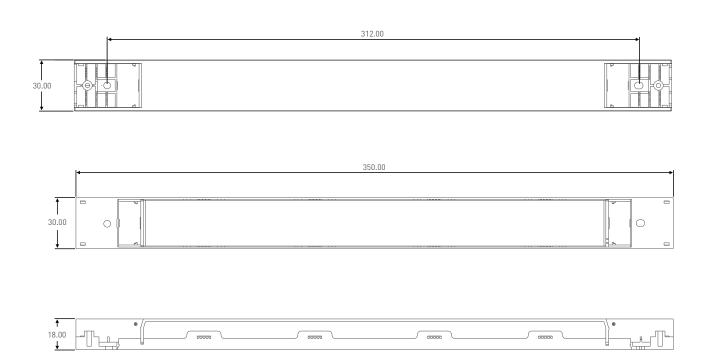

Technical Specs

Model	Model Specs		-24-G1N			
	Output Type		Constant Voltage			
Features	Output Feature	Isolatio				
	Protection Grade	IP20				
	Insulation Grade	Class II (Suitable for class I/ II /III light fixtures)				
OUTPUT	Output Voltage	24Vdc				
	Output Voltage Range	24Vdc±0.5Vdc				
	Output Current	Max. 6.25A				
	Output Power	Max. 15				
	Output Power Range	0-150W				
	Dimming Range	0~100%, down to 0.1%				
	Overload Power Limitation		≥102%			
	Ripple & Noise	Ripple<900mV, Noise<900mV				
INPUT	DC Voltage Range	220-240Vdc				
	Input Voltage	220-240Vac				
	Frequency	0/50/60Hz				
	Input Current	Мах. 0.75A/230Vac				
	Power Factor					
	THD	PF>0.97 (at full load) THD=10% (at full load)				
	Maximum input power	THD<10% (at full load)				
	Efficiency (Typ.)	Max. 162W				
	Inrush Current	93% Cold start 45A/Test twidth-350us tested under 50% Ineakl/230Vac				
		Cold start 45A(Test twidth=350us tested under 50% peak)/230Vac				
	Anti Surge Leakage Current	L-N: 2KV				
	Working Temperature	Max. 0.5mA ta: -20 ~ 45°C tc: 90°C				
	Working Humidity	20 ~ 95%RH, non-condensing				
ENVIRONMENT	Storage Temperature/Humidity	-40 ~ 80°C/10~95%RH				
ENVIRONMENT						
	Temperature Coefficient	±0.03%/°C(0-50°C)				
	Vibration	10-500Hz, 2G 12min/1cycle, 72 min for X, Y and Z axes respectively				
PROTECTION	Overload Protection	Shut down the output when current load>102%, auto recovers.				
	Overheat Protection Overvoltage protection	Intelligently adjusting or turning off the output current if the PCB temperature >110°C, auto recovers				
		Shut down the output when non-load voltage >30V, re-power on to recover after fault condition is removed Shut down automatically if short circuit occurs, auto recovers.				
	Short Circuit Protection Withstand Voltage		I/P-0/P: 3750Vac			
	Insulation Resistance		I/P-0/P: 3750VaC I/P-0/P: 1 Insulation Resistance 100MΩ/500VDC/25°C/70%RH

Product Size

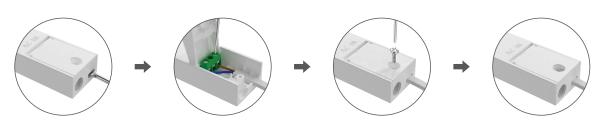

Unit: mm

Wiring Diagram

Application Diagram of Protective Cover

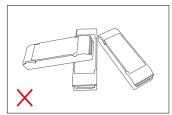

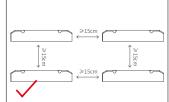

1.Put the head of the screwdriver at the cable entry to pry up the protective cover, then connect the wires as the wiring diagram shown

 $2.\ \mbox{After closing the protective cover, tighten the protective cover with the PA screws$

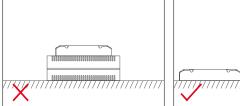

Installation Precautions

Please do not stack the products. The distance between two products should be ≥15cm so as not to affect heat dissipation or the lifetime of the products.

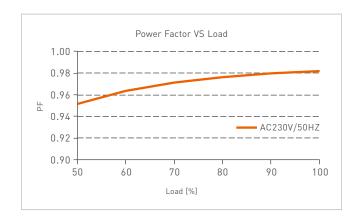

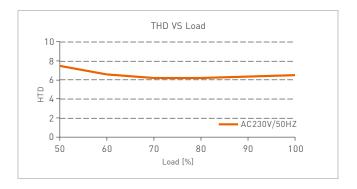

Please not place the products on power supplies. The distance between the product and the power supplies should be >15cm so as not to affect heat dissipation or shorten the lifetime of the products.

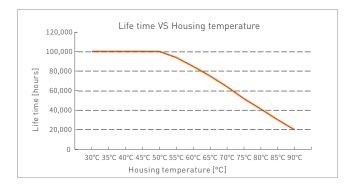

Note: The temperature within the installation area should be within the working temperature range of the products. Please do not install products inside LED fixtures to avoid temperature exceeding the working temperature that may affect the product lifetime.

Relationship Diagrams

Transportation and Storage

1. Transportation

Products can be shipped via vehicles, boats and planes.

During transportation, products should be protected from rain and sun. Please avoid severe shock and vibration during the loading and unloading process.

2. Storage

The storage conditions should comply with the Class I Environmental Standards. The products that have been stored for more than six months are recommended to be re-inspected and can be used only after they have been qualified.

Attentions

- Products shall be installed by qualified professionals.
- LTECH products are and not lightningproof non-waterproof (special models excepted). Please avoid the sun and rain. When installed outdoors, please ensure they are mounted in a water proof enclosure or in an area equipped with lightning protection devices.
- Good heat dissipation will prolong the working life of products. Please ensure good ventilation.
- $\bullet \quad \text{Please check if the working voltage used complies with the parameter requirements of products}.$
- The diameter of wire used must be able to load the light fixtures you connect and ensure the firm wiring.
- Before you power on products, please make sure all the wiring is correct in case of incorrect connection that causes damage to light fixtures.
- If a fault occurs, please do not attempt to fix products by yourself. If you have any question, please contact your suppliers.
- * This manual is subject to changes without further notice. Product functions depend on the goods. Please feel free to contact our official distributors if you have any question.

Warranty Agreement

- Warranty periods from the date of delivery: 5 years.
- Free repair or replacement services for quality problems are provided within warranty periods.

Warranty exclusions below:

- Beyond warranty periods.
- Any artificial damage caused by high voltage, overload, or improper operations.
- Products with severe physical damage.
- \bullet $\,$ Damage caused by natural disasters and force majeure.
- $\bullet \quad \text{Warranty labels and barcodes have been damaged}.$
- No any contract signed by LTECH.
- $1. \ Repair or replacement provided is the only remedy for customers. \ LTECH is not liable for any incidental or consequential damage unless it is within the law.$
- 2. LTECH has the right to amend or adjust the terms of this warranty, and release in written form shall prevail.
